Trends and Hype 3

By disciplined_daytrader · April 27, 2024

AI definitely dying down a bit and interest rate cuts only expecting 1 for the whole year when originally it was 4 which is quite ridiculous. TSLA huge bearish sentiment and AI seeming to finally go into its pullback. The only question is, is this just the beginning of the hype or is it over for a few years? I think its always safer to assume the trend will continue instead of thinking the trend will reverse.
